Art Unit: 1711

1. Claims under examination are 1-5
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Squiller et al (USP 6103849) in view of Okuno et al (USP 4562237) and Konig et al (USP 6060573).

Squiller discloses one-component polyurethane compositions made up of (a) blocked isocyanate, (b) polyketimine, polyenamine or oxazolidine and (c) a compound that generates water (abstract). Some isocyanate-reactive compounds are set forth in col. 6, lines 442 and they read on the (claimed) off-containing polymeric compound (viz (ii) of instant claim 1). Squiller does not mention (i) a polyisocyanate which is blocked by CH-acidic ester and (ii) a tetravalent titanium compound.
